

## Press Release

### **Tech Systems, Inc Announces ISO 27001 Certification**

Compliance with globally recognized standard attests to Tech Systems' commitment to security governance.

**Buford GA, February 12, 2018:** Tech Systems, Inc. is excited to announce they've achieved their ISO 27001 certification. This certification applies to the international standard that describes the best practices for an information security management system (ISMS). This ISO family of standards ensures the secure management of financial information, intellectual property, employee details or information entrusted to you by third parties. This is just another exciting milestone in the history of Tech Systems.

The process involved a rigorous audit entailing thorough interviews with Administration, Security Operations Center (SOC), Quality Assurance, Human Resources and Finance, as well as investigation of risk management, physical security, access controls, and security best practices. Tech Systems' ISMS successfully met all logical, process, physical and management controls to achieve compliance with the standard.

In 2008, Tech Systems achieved their ISO 9001 certification. Their business has grown tremendously by applying the principles of quality management and continuous improvement. The ISO 27001 certification underscores Tech Systems' strong commitment to their ongoing development of their Information Security Management System. TSI has always been a forward-thinking company. "To our knowledge, Tech Systems is the only security integrator with the ISO 27001 designation. This certification uniquely positions us in the marketplace with respect to the rapidly changing security integration technologies, and how we manage our client's technology and information throughout the entire value chain," said Wayne Smith, President of the organization.

Tech Systems, Inc is unique in the integration of security systems due to their culture of investment and ownership via their Employee Stock Ownership Plan. Each employee/partner retains the ability to make decisions based upon the needs of their clients and their business, solely. This commitment to client satisfaction is the heart of their **F.O.C.U.S.®** initiative.

Tech Systems, Inc structures each business relationship For Our Client's Ultimate Satisfaction (**F.O.C.U.S.®**). Customer service is at the heart the services they provide - 24 hours a day, 7 days a week customer support, with 100% guaranteed satisfaction reflects this dedication. Tech Systems believes in fanatical customer service and proves this through their daily customer relationships. These relationships are built on dedication helping their clients mitigate risk while preventing critical situations before they occur. Tech Systems takes the fear of hidden fees out of their customers' minds by offering unlimited support calls and on-site repairs which are included in the price of all annual contracts.

**For Immediate Release**

About Tech Systems, Inc.: Tech Systems, Inc. is a leading provider of integrated security solutions for a diverse range of national and international clients.
